

Explanation

For each notification presented, the holders of voting rights have been **numbered**. In this way, a distinction can be made in joint notifications between notifications by

1° controlling persons and the undertakings they control (hereafter groups): these are indicated by a single number;

2° persons acting in concert: these are assigned a number per party acting in concert.

In notifications by groups, the **order of the names** of the holders of voting rights is determined by their place in the chain of controlled undertakings: as a rule, the ultimate controlling person is indicated first (where there is one), followed by the second level in the chain, and so on down the control chain. **Figures** are provided next to the name of a holder of voting rights only if it has a direct shareholding. Thus holders of voting rights for which no figures are provided have only an indirect shareholding, via the undertakings they control.
